

Symposium: Current directions in symbolic number processing

1. Automatic place-value activation in magnitude-irrelevant parity judgement
 - Hans-Christoph Nuerk (presented by Krzysztof Cipora), University of Tuebingen
2. Similar but not the same: Examining differences in symbolic distance effects arising in commonly-employed tasks
 - Erin Maloney, University of Ottawa
3. Distance and size effect - how they relate to math skill: A look at professional mathematicians
 - Krzysztof Cipora, University of Tuebingen
4. A hierarchical Bayesian model of individual difference structures for the size-congruity effect
 - Tom Faulkenberry, Tarleton State University
